

UC Santa Cruz Marine Science Campus Coastal Long Range Development Plan
November 2006
As Resubmitted to the California Coastal Commission

ERRATA

Chapter 1, Page 2: Revise the second full paragraph on the page to read as follows:

The anticipated horizon year the building program under the CLRDP is ~~2025~~ 2020, ~~19~~ years from the anticipated date of Coastal Commission certification.... It neither commits the University to achieve the projected level of development by ~~2025~~ 2020 nor does the CLRDP expire at this time.... Conversely, in the event that campus development occurs more slowly than anticipated.... the horizon year for the building program under this CLRDP may extend beyond ~~2025~~ 2020.

UC Santa Cruz Marine Science Campus CLRDP Environmental Impact Report (SCH No. 2001112014) Addendum #1: Proposed Revisions to the CLRDP. November 2006.
Prepared by Martin Carver, Coastplans. Santa Cruz, for UCSC.

ERRATA

Revise p. 19 as follows:

Figure 5.1 in the addendum should conform with Figure 5.1 in the revised CLRDP (November 2006). Specifically, subtotal new building space included in the plan is 322,825 gsf, rather than 327, 225. The addendum incorrectly included 3,000 gsf of temporary office trailers and 1,400 gsf of temporary caretaker housing units that would be removed from the Marine Science Campus under the revised CLRDP. This change does not alter the conclusions of any of the environmental analyses presented in the addendum.
